

To my surprise, I received photo credits in Bronze on the 714 Main building that XTO restored over the last 4 years! I had documented the complete restoration of this historic building from day one to the final portrait of her. A completely new facade was installed to recreate the original 1900 era look. Bronze light sconces were designed for each stone column and each has a historical photo showing the history of this space in downtown Fort Worth. My images and credits are on both sides of the marble doorway! What an honor to be included in this magnificent project. Thanks to Joy Webster, the driving force who made all this happen!

When in downtown check out this beautiful building on the corner of 7th and Main.
